

EDUCATION

University of Pennsylvania
M.S.E. in Computer and Information Science

Philadelphia, PA
Aug. 2026 – May 2028 (Expected)

New York University
B.A. in Computer Science and Mathematics, summa cum laude

New York, NY
Sept. 2019 – May 2023

- **GPA:** 3.94/4.00
- **Honors:** Dean's List for Academic Years 2019-2023, Phi Beta Kappa, University Honors Scholar

EXPERIENCE

Lutron Electronics
Senior Project Software Engineer

Philadelphia, PA
Jan. 2025 – Jul. 2026

- Led 6-person engineering team as Scrum Master, coordinating with PM on priorities, feedback, dependencies, and phased rollouts to deliver planned features per program increment.
- Collaborated with MFE Platform Lead to standardize AI-assisted engineering workflows; shared debugging MCP tools to streamline UI iteration, reducing feature implementation time by ~50%.
- Pioneered a cloud-based firmware upgrade feature (AWS Lambda, AWS SQS, React) that parallelized 1,000+ streams of guestroom updates; improved IoT system start-up efficiency for Hospitality Technology Integrators by reducing upgrade time by 90%
- Prototyped a WebSocket-based architecture for real-time smart device updates, reducing processor polling overhead and enabling more responsive IoT dashboard with <500ms update latency
- Implemented processor-core logging with C++ for 4 hospitality system metrics, improving operational visibility and diagnostics across hotel deployment workflows.

Project Software Engineer

Jul. 2023 – Jan. 2025

- Designed and maintained a feature access control service with a microservices-based architecture (AWS Lambda, Golang), unifying 3 IoT workflows across hospitality, residential, and commercial environments
- Implemented core features for next-generation hospitality IoT systems, empowering hotel managers to monitor real-time property-wide operations status and receive 10+ types of proactive system alerts on 100+ lighting control stations
- Served as frontend (React, Typescript) subject matter expert and mentored 10 developers on best practices; established behavior-driven integration testing with Page Object Model, enhancing QA reliability and cutting test flakiness by 30%

Lutron Electronics
Software Engineer Intern

Philadelphia, PA
May 2022 – Jul. 2022

- Spearheaded and deployed Company's first web-based IoT monitoring tool to replace its dated desktop software; enabled real-time diagnostics and reduced system analysis time by 50%
- Proposed and constructed a design system and Micro Frontend architecture to senior engineering leadership; proposals adopted as core infrastructure in standardizing UI development practices across teams
- Engineered modular React + TypeScript front-end, achieved 91% unit test coverage (Jest) and automated end-to-end testing (Cypress)

US Cabinet Depot
Software Engineer Intern

Kennesaw, GA
Jun. 2021 – Aug. 2021

- Developed and launched an e-commerce platform with Nuxt.js and Vuetify, optimized content loading time by 20%

PROJECT & CAMPUS EXPERIENCE

New York University
Grader, CSCI-UA 310 Basic Algorithms, Prof. Alan Siegel

New York, NY
Sep. 2021 – Dec. 2021

- Evaluated and graded weekly assignments for 100+ students; collaborated with faculty to maintain consistent grading standards

SKILLS & INTERESTS

Programming Languages: TypeScript, Java, Python, GoLang, SQL, C++, HTML/CSS, MATLAB

Frameworks and Databases: React, NodeJs, ExpressJs, AWS DynamoDB, PostgreSQL, MongoDB

Languages: Mandarin (fluent)

Interests: Marathon (Brooklyn Half -- 2:10, DC Half – 2:06, Philly Half – 1:54), Board Games, Hiking
