

EDUCATION

University of Pennsylvania
M.S.E. in Computer and Information Science

Philadelphia, PA
Aug. 2026 – May 2028 (Expected)

New York University
B.A. in Computer Science and Mathematics, summa cum laude

New York, NY
Sept. 2019 – May 2023

- **GPA:** 3.94/4.00
- **Honors:** Dean's List for Academic Years 2019-2023, Phi Beta Kappa, University Honors Scholar

EXPERIENCE

Lutron Electronics
Senior Project Software Engineer

Philadelphia, PA
Jan. 2025 – Jul. 2026

- Led the design and delivery of a cloud-based firmware upgrade workflow using AWS Lambda, AWS SQS, and React, parallelizing more than 1,000 guestroom update streams and reducing upgrade time by 90% for Hospitality Technology Integrators.
- Architected and validated a WebSocket-based system for real-time smart device updates, reducing processor polling overhead and achieving <500 ms IoT dashboard latency.
- Standardized AI-assisted engineering workflows with the micro-frontend platform lead; integrated debugging MCP tools that streamlined UI iteration and reduced feature implementation time by ~50%.
- Facilitated delivery for a 6-person engineering team as Scrum Master, aligning priorities, feedback, dependencies, and phased rollouts with the PM across program increments.
- Developed processor-core logging in C++ for 4 hospitality system metrics, improving operational visibility and diagnostics across hotel deployment workflows.

Project Software Engineer

Jul. 2023 – Jan. 2025

- Delivered a cloud feature-gating service in Go and AWS Lambda, enabling a single dashboard to support type-specific functionality across hospitality, residential, and commercial IoT systems.
- Implemented core capabilities for next-generation hospitality IoT systems, providing hotel managers with property-wide operational monitoring and 10+ proactive alert types across 100+ lighting control stations.
- Established React and TypeScript standards as frontend subject matter expert, mentored 10 developers, and introduced behavior-driven integration testing with the Page Object Model, reducing test flakiness by 30%.

Lutron Electronics
Software Engineer Intern

Philadelphia, PA
May 2022 – Jul. 2022

- Launched Lutron's first web-based IoT monitoring tool using React and TypeScript, enabling real-time diagnostics and reducing system analysis time by 50%.
- Introduced a design system and Micro Frontend architecture adopted by senior engineering leadership as shared infrastructure for UI development across teams.

US Cabinet Depot
Software Engineer Intern

Kennesaw, GA
Jun. 2021 – Aug. 2021

- Created and launched an e-commerce platform with Nuxt.js and Vuetify, improving content loading time by 20%.

PROJECT & CAMPUS EXPERIENCE

New York University
Grader, CSCI-UA 310 Basic Algorithms, Prof. Alan Siegel

New York, NY
Sep. 2021 – Dec. 2021

- Evaluated weekly assignments for 100+ students and collaborated with faculty to maintain consistent grading standards.

SKILLS & INTERESTS

Programming Languages: TypeScript, Java, Python, Go, SQL, C++, HTML/CSS

Frameworks and Databases: React, Node.js, Express.js, DynamoDB, MongoDB

Languages: Mandarin (fluent)

Interests: Marathon (Brooklyn Half -- 2:10, DC Half – 2:06, Philly Half – 1:54), Board Games, Hiking
